

SNAKE PLANT *Sansevieria trifasciata*

Also known as a Striped Mother-in-Law's Tongue, this Snake Plant comes planted in a modern white ceramic pot. Snake Plants produce tall, sword-shaped foliage that require little pruning. Place in bright indirect light for faster growth, but plants will also tolerate low levels of sunlight. Check the soil for dampness once a week. If dry, add about a cup of water, keeping in mind that any excess will build up in the bottom and should be avoided.

GEOGRAPHIC ORIGIN:

Tropical Africa

GREAT FOR: Low light

FEATURES:

Low-maintenance; Air-purifying

GROWTH RATE: Slow

LIGHT

Prefers bright, indirect light but can tolerate low light as well.

WATER

Allow soil to dry out completely and water less often in winter.

LEVEL OF CARE

Easy! Just make sure not to overwater.

TEMPERATURE

Prefers warm conditions above 50F. Keep away from drafty windows and air conditioners.

FERTILIZER

Feed with a mild liquid indoor plant fertilizer about once a month during the growing season. Do not fertilize in winter.

SOIL

Light, loose & airy. Cacti/ Succulent Mix or African Violet Mix work best. If using All-Purpose Potting Mix, just add some perlite, vermiculite, or sand.

PRUNING & PROPAGATION

Trim damaged leaves down to the base with clean shears. To propagate, divide plant when repotting during the spring.

PET FRIENDLY?

Sorry! Contains saponins, which are chemical compounds that can make dogs and cats nauseous if the leaves are consumed.
